ABOUT ME

I am a motivated third-year Software Development student with a Diploma from the Belgium Campus. My background includes programming, project management, and problem-solving skills. Currently, I'm enhancing my abilities through an AI Software Development Learnership. I'm passionate about creating innovative solutions that have a positive impact. With a growth mindset and adaptability, I have a strong interest in emerging technologies. I look forward to contributing my ideas and skills to a forward-thinking development team while preparing for a Cloud Computing certification to expand my expertise.

SKILLS

HTML
CSS
Javascript

React.js
C#
Node.js

Express.js
MongoDB
SQL

GIT & GitHub
VS code
Figma

Problem-solving
Agile & Project
Management
Teamwork

PROFESSIONAL EXPERIENCE

Frontend Developer — BC CourseFinder™ (Academic Project)

Belgium Campus iTversity | 2026

- Developed a web application that helps students choose courses using AI
- Built the user interface with HTML, CSS, and JavaScript in a neo-brutalist style with navy and yellow colors
- Ensured the design was responsive and user-friendly across all devices
- Collaborated with backend developers to connect to a .NET API and set up JWT authentication
- Created project documentation and presented the solution to lecturers

Solar Car Project (Academic Project)

Belgium Campus iTversity | 2024

- Researched and recommended the right parts and materials for building a solar vehicle
- Created technical drawings and design documents to help with construction
- Helped with system integration, wiring planning, and solving problems during the build with the team
- Assisted in project planning, tracking progress, and dividing tasks using Agile methods
- Wrote project reports and presented the finished vehicle to a judging panel

Smart IoT Lecture Room System (In Development)

Belgium Campus iTversity | 2026

- Taking part in planning and gathering requirements for a smart IoT-enabled lecture room system
- Backend developer, focusing on server-side logic, developing APIs, and integrating IoT data
- Project aims to automate room management using IoT sensors and real-time monitoring
- Working with the team to define system architecture, technical requirements, and database design
- Documenting progress through reports and presentations

Personal Developer Portfolio

Belgium Campus iTversity | 2026

- Designed and developed a personal portfolio website using HTML, CSS, JavaScript, and React
- The website showcases academic and personal projects, highlighting frontend development skills

EDUCATION

AI Software Development (NQF 5)

Synergy

Jan 2026 - Present

Diploma in IT - Software Development

Belgium Campus iTversity

Sept 2024 - Present

Dynamic DNA NQF4

Software development

June 2023 - May 2024

National Senior Certificate

Waverley Girls High School

Feb 2014 - Dec 2018
